Mission

The Quantifying abuse arm of Executive Dysfunction is a humanitarian initiative to **introduce data metrics into the court system to mitigate, and eventually eliminate, the risks of domestic violence.**

Quantifying Abuse introduces a **comprehensive data structure by which to measure emotional abuse;** connecting the stories of all abuse victims so it is measurable, traceable, and can be managed.

Quantifying Abuse will **identify individuals within our society whom have neurological issues which allow them to hurt others without empathy.**

We are going to identify them so we can HELP THEM!

5 Steps to Save the World

You may be asking how the hell we are going to accomplish such a feat, **especially when there will be many that have a vested interest in this not occurring.**

I'm am functionally aware of the system, its dirty players, and the walls put up in front of me.

We are just going to go around them. The plan will work both from the bottom up and the top down. **Once is has started, it will not be able to be stopped.** Once metrics are introduced they will be able to be utilized within all cases going forward.

The hurdle that we are going to have to conquer is awareness; getting the messaging out.

To facilitate this the plan is to work via domestic abuse agencis, governments, legal organizations, and the general public to ensure that it is successful.

1

Pick a Metric, Any Metric

I have provided you with a comprehensive set of metrics to track abuse with text only (no witness accounts).

Within each system there will need to be metrics chosen. I like trifecta, but you can adapt this as you see fit. I'm not the only brain at the table here, I'm just starting the conversation.

Pick something consistent.

2

CONSISTENT metrics within court documents

Calculate the metric for multiple cases currently in your judicial system for domestic abuse, and ensure the metric is consistently applied and identified within the court documents. Note: lateral organization of this is most likely best via a domesic abuse agency/Legal firm.

3

GET A JUDGEMENT

4

Post Judgement – Consistent Metrics and Range

When the judgements are made, a range will start to naturally appear within the data which can be easily utilized for basically every case in which consistent metrics also apply.

5

Standardization & Decommision of Judicial Processes

Once the same metrics are reviewed multiple times, Judges will start to get frustrated with the monotony of the rulings because they have become so consistent that they take no cognition to make. They will be practically a figurehead in the role which is when old policies can be decommissioned.

Quantifying Abuse Report

This 24 page report is likely unlike any that you have read.
I am a business analyst by trade and a remedial one at that.
Thankfully this is catered to be simple on purpose; this is designed to ensure that this can be widely applied.

The report is split into 2 parts.

- Structure of Emotional Abuse
- Final Metrics of my Case

The report is written and designed to facilitate the development of an AI product wherein these metrics can be produced without the need of human interaction.

This will allow the system to identify those who may need assistance through this process so we can help.

Quantifying Abuse Structure

Emotional Abuse

By far the most valuable thing within this report is the structure of abuse; the system by which we are going to measure the abuse.

For this system to be applied in an effective manner, consistent metrics are required. Consistent systems means that we can compare metrics between cases, this is where the magic is. Consistent data means mass measurement and ultimately behavioral change.

The abuse "types" are three actions taken from a abuser towards a victim as a form of emotional abuse. These types (Blaming, Demeaning, and Threatening) are actions taken towards the victim.

The Vehicles are the delivery system for the types of abuse; they are how the abuser utilizes the incidences in the trifecta against the victim.

As detailed in the report, the trifecta is comprehensive and can be implemented. The vehicles are for discussion/development.

EXECUTIVE DYSFUNCTION

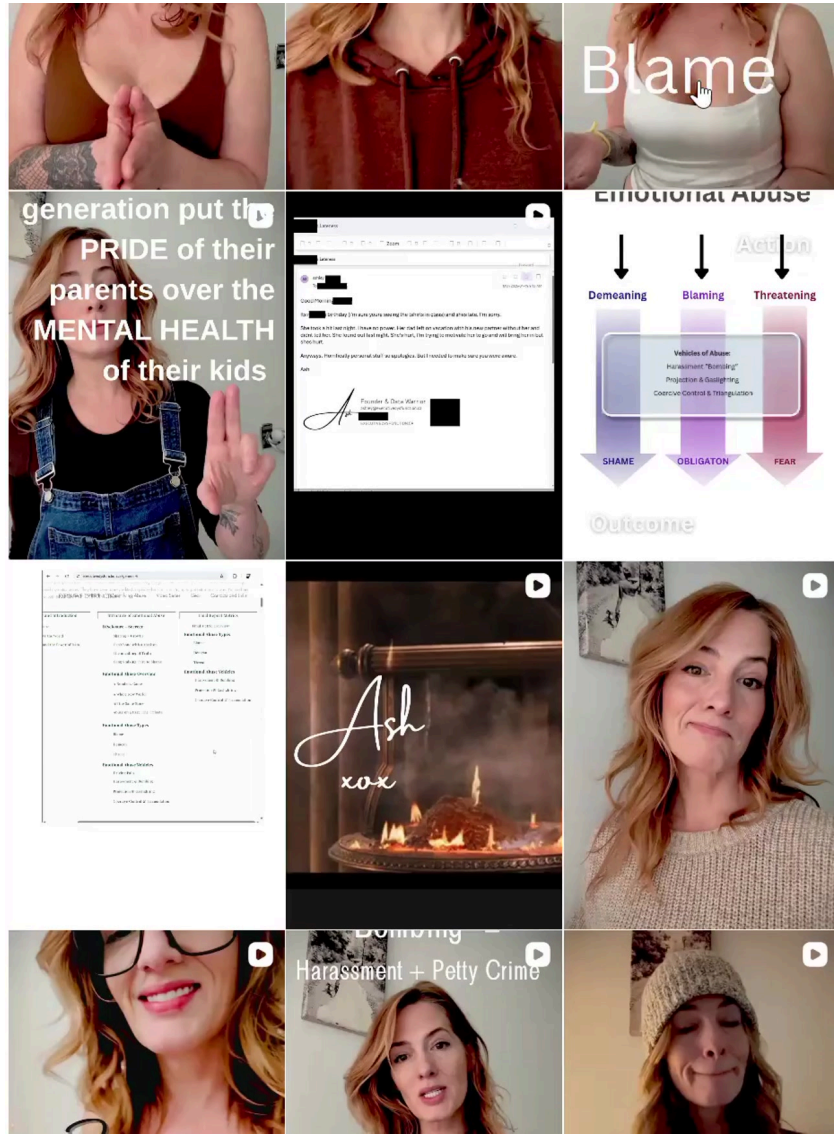

Social Media & Presence

Following the release of the Quantifying Abuse Report on December 20th 2025, the video series was developed to socialize the concepts discussed in the report.

The videos have been distributed with little/no promotional boosting for the safety of the organization. The slow growth here is designed to facilitate growth on the team before the messages reach a publicity level (wherein security will become a concern).

These platforms have been compromised, and further social media presence will need to be positioned carefully to mitigate these roadblocks.

Further plans for social media presence are discussed in Next Steps

Quantifying Abuse Video Series

Following the release of the Quantifying Abuse Report on December 20th 2025, the video series was developed to socialize the concepts discussed in the report.

The videos have been distributed with little/no promotional boosting for the safety of the organization. The slow growth here is designed to facilitate growth on the team before the messages reach a publicity level (wherein security will become a concern).

Gradient indicates Timeline

Executive Dysfunction

Please note, these are all separate components of the ED tree.
This presentation is specific to the Quantifying Abuse arm of the organization.

Quantifying Abuse

A structure to connect the stories of all victims. Identifying abusers within the family court system.

Provide an early warning system to high conflict situations.

The Label

Connecting abuse victims across nations, all genders, all races, all creeds.

Providing community to those who have lost family due to generational trauma.

Holistic Theories

Connecting Psychology, Generational Trauma, religion, history.

Exploring the patterns of life, and how we got to the stage where we need to make these changes

Data Hub

Centralized Data from the Project. A bank for abuse metrics. Quantitative data on polarization in communities. Tested holistic theories via survey work. This information WILL BE 100% PUBLIC.

Information collected from the HUB will drive treatments utilized in the retreats hosted at The Burrow.

Future work will include some lost knowledge. I would like to open the door to learning about alternative therapies. testing frequencies, crystals, materials, meditation, etc.

The Burrow

Sanctuary and Retreat Centre.

17 Acres of forest will act as a homestead for ED, and the data hub, and will also include a retreat centre.

The sanctuary will act as a directly mitigant to some of he issues in current life (financial, structural, efficiency)

The Retreat centre will act like a rehab centre for polarized individuals, this could easily be positioned as “rehab for bad relationships”.

Quantifying Abuse Goals

Quantifying Abuse

1. Centralized Awareness Campaign

Goal: Refine and formalize messaging. Utilize alternative methods to circulate information to ensure the information reaches intended targets.

2B. Develop AI Program/APP

Goal: Utilize the trifecta to asses domestic abuse cases. Ensure its utilized within the court system

2A. Metrics into the court system

Goal: Utilize the trifecta to asses domestic abuse cases. Ensure its utilized within the court system

Work within current structures

3A. Institutional Support

Goal: Socialize Quantifying Abuse with Institutional Stakeholders; utilize institutional stakeholders to facilitate adaption at a structural level.

F*uk the System!!

3B. DA Victim Stakeholders

Goal: work with victims to apply the science to individual cases. Stewart individual cases at the onset to ensure their processing through the system.,

Court Rulings

Data Hub

1. Centralized Awareness Campaign

1

Structural Standardization and formalization of Key Messages

- formalize key messages
- Streamline content
- Grow Platforms and Reach

2

Development of tools and guidance

- Development of ED templates and files. **Guidance for victims on how to track & calculate metrics**
- Training materials for consultants (Online?)

3

Exploration of alterative reach options (specifically vague)

- Flood the market
- Pound the pavement
- Hidden Mickeys

Cost Projections

The actions in this component are fundamental and are a pre-requisite to the rest of the project. The materials need to be edited and formalized. training material needs to be produced, basically sharpening.

There are many options for contract-based administrative support that I would like to explore to take some of the administrative weight off of me.

My social media skills are also remedial at best. This project deserves some better content. I would like to hire someone to help me put together posts.

These are ballpark costs and have not been confirmed with actual contractors yet.

Social Media Support	10,000
Administration Support	10,000
Materials	5,000

1 March

2 April

3 May

2A. Metrics into the Court System

Pre requisites

- Guidance Materials - Training & Metric Calculations
- Regional Ambassadors

To facilitate this messaging going in at a deep level, I would like to hire “ambassadors” which will act as such and do the groundwork with the impacted organizations. This will be a relationship management position and will only be needed for a short period to socialize the concept.

This is fundamental for buy in. Humans meeting humans.

6 contractors x 25,000

3A. Institutional Support

Facilitate the launch of Quantifying Abuse via engagement with regional representation in impacted organizations.

Pre requisite: Regional Ambassadors (Contract roles)

- Build and maintain a group of local stakeholders within the domestic abuse industry; to include, but not limited to: domestic abuse organizations, courts, legal representation,
- Provide training and guidance on the system
- Work through stakeholders to identify appropriate victims for metric calculation

3B. DA Victim Stakeholders

Work with domestic abuse victims to calculate the metrics for their cases; Facilitate the recording of the metrics in the court proceedings.

Pre requisite: Domestic Abuse Victims

- Develop and maintain relationships with domestic abuse victims.
- Work with domestic abuse victims to ensure the data for their case is appropriately tracked ad recorded.
- Calculate consistent metrics & record these in the data hub

2B. Develop AI Program /APP

1

Development of Product Requirements /Specifications

- Formalize the structure for the trifecta
- Development of Data Parameters

2

Build a relationship with a development company

- Locate, develop, & maintain a relationship with a application development company.
- Liaise with the company in the development of the product.

3

Build, Test, Launch

- Build the product via the development company
- Test the application amongst high conflict abuse victims.
- Launch the program.

Cost Projections

Due to the limited knowledge of the organization in terms of App development, this component of the project is best served with technological expertise around the table.

If we do this correctly, it can mean real change at a speed no one has seen before.

A quick google put the cost estimation between 5-500K. Obviously a wide range, so putting in 250K until a more solid number is determined.,
